SUMMARY

Full Stack Developer specialized in developing web applications using MERN, Next.js, and Nest.js. I possess expertise in building fast and responsive applications with a focus on performance and user experience. I work on transforming ideas into innovative digital solutions that meet client needs and deliver outstanding results. I am always striving to provide effective and sustainable solutions that contribute to the success of businesses and projects.

WORK EXPERIENCE

LinkerFolio · Self-employed   Aug 2024 - Oct 2024
Full Stack Developer - Portfolio Platform Project

- Developed an elegant interface to showcase professional portfolios.
- Developed a system to manage social media and business links.
- Created a QR code generation feature to facilitate sharing the Portfolio via mobile devices.
- Implemented automatic translation for the Portfolio, helping reach a wider audience.
- Integrated a chat system within the app to enhance communication between users.
- Added an option to customize the background color of the Portfolio to match the user's personal style.

Académie Régionale d'Éducation et de Formation · Internship   Mar 2024 - Apr 2024
Full Stack MERN Developer

- Designed and developed a task management application allowing users to add, edit, and delete tasks.
- Implemented authentication and authorization using JWT to ensure the security of the application.
- Tested API endpoints using Postman to ensure proper functionality.
- Improved user experience by designing a simple and user-friendly interface.
- Deployed the application on Vercel and managed the codebase using Git/GitHub.

Cités des Métiers et des Compétences · Internship   Sep 2023 - Jun 2024
Full Stack Developer

- designed interactive and attractive user interfaces in front-end development.
- acquired experience in back-end development and database management.
- developed skills in creating and maintaining dynamic web applications.
- applied Agile methodology to improve efficiency and strengthen teamwork.
- gained experience using Git and GitHub for effective code and project management.
- used SonarQube to analyze code quality and ensure continuous improvement.
- used Docker to streamline environment management and application development.
- enhanced interpersonal skills, including communication and teamwork, for better preparedness in diverse work environments.
